

## Mobile App for Learning

If you use a mobile device for Learning, you can now install a Mobile App for using our Learning system. This app makes it simple to find and access the Learning system, and gives the capability to take some content offline to use in places with poor connectivity.

To install the app on your mobile device, just head to <https://<customerurlhere>.kallidus-suite.com> and log in as usual. You should then be prompted to install the mobile app.

This app is built on Progressive Web technology, so there is not even a need to find it in the App Store!
